

## Guidelines for the homework

### Of the discipline "INTERNATIONAL INVESTMENT ACTIVITY" for students

#### Topics for the homework

1. Global trends in international investment activity in 2013-2017.
2. Asia Pacific trends in international investment activity in 2013-2017.
3. North America trends in international investment activity in 2013-2017.
4. Latin America trends in international investment activity in 2013-2017.
5. The EU's trends in international investment activity in 2013-2017.
6. Middle and East Asia trends in international investment activity in 2013-2017.
7. Ukrainian trends in international investment activity in 2013-2017.
8. Russian Federation's trends in international investment activity in 2013-2017.
9. Modern trends of innovative development of the world economy in 2013-2017.
10. The mechanism of the state regulation of international investment activity in Ukraine.
11. The mechanism of the state regulation of international investment activity of the world's leading countries.
12. Future global trends in international investment activity in 2019-2021.
13. Global trends in international innovation activity in 2013-2017.
14. The mechanism of the state regulation of international innovation activity in Ukraine.
15. The mechanism of the state regulation of international innovation activity of the world's leading countries.
16. Ukrainian trends in international innovation activity in 2013-2017.
17. The EU's trends in international innovation activity in 2013-2017.

## **General requirements for a homework**

A homework is the result of student's self-guided work by studying the subject "International investment activity". The task covers a number of key- sections of the course and allows the student to discover the creativity in a comprehensive approach in solving problems.

The main goal of the course is to consolidate student's skills, the usage of theoretical knowledge in international management of innovative activity.

An Explanatory note includes: title page, table of contents, list of references, appendices.

Title page of the paper is drawn according to the established form (see appendix)

Topics for the homework are distributed according to the student's number in the register. In exceptional cases, the students are allowed to change the topic to one that is free (№29-30).

A student must hand in the homework his scientific supervisor at fixed time.

### **Requirements for the content (table of contents) of the homework**

The homework must have clear and logical structure.

The key-parts of the homework must be:

- title page (see the example);
- table of contents;
- introduction (2-3 p.);
- body (15-20 p.);
- conclusions (3 p.);
- list of references;
- appendices.

The scope of the paper - 30-35 p. Font – 14 Times New Roman.

Line space - 1.5.

Margins: top and bottom - 2 cm, left - 3 cm, right - 1 cm.

Alignment - the width. Indent (first line indent) - 1.25 cm.

The content of the homework should cover the main issues of the topic. It must be clear and logically consistent.

In the introduction to the homework the topicality of the chosen topic is revealed, problems and issues that require resolution are briefly characterized, a goal and objectives of the homework, its scientific novelty and practical value are clearly formulated.

The main part provides a deep and comprehensive disclosure of the contents of the chosen topic, its most important issues.

It is necessary to show how these issues are covered in the scientific literature to present different points of view and perform their critical analysis.

Every particular topic of the course paper must be considered from the standpoint of modern theoretical position accompanied by analysis of practical data of the subject of international innovation activity (international corporations, states, integration associations, etc.). It is necessary to demonstrate the ability to make conclusions independently based on referrals and literature.

If the homework consists of pages copied from textbooks and other literature without deep research, it means that this course paper is considered to be unfulfilled.

In conclusions in brief form the conclusions are set out, that indicate the degree of solving the problem and achievement of the objectives that are set out in the introduction.

Appendices include additional materials that help in a more complete disclosure of the homework's topic.

The student forms the homework according to the established requirements and deliver it to the supervisor for verification (checking). If a positive assessment homework is allowed for the defense.

If the homework does not meet the requirements that are set out in the guidance, it is returned for revision.

At the defense of the course paper students must demonstrate knowledge of all the material of the topic, reveal the content of the problem and offer the optimized way of its solving.

The homework must be performed in English. Abbreviations, except for widespread, are not allowed. The text is placed only on one side of the sheet of A4. The table of contents goes after the title page (page 1) . Page numbering begins with an introduction (page 3). Each section starts with the main part of the new page.

Sections are represented by Arabic numerals (1, 2, 3, ...) and units - the number of the section and subsection serial number through the point (2.1, 2.2, 2.3, ...).

Figures, tables are placed after the first footnotes in the text. Footnote in the text to tables and figures are obligatory.

Tables and figures in the course paper must be named. Their numbering units are similar to the main part (tab. 2.1, Fig. 3.2, etc.).

While using the text material with specific references footnote should be done as follows: [3, P. 38]
