THE BEST WAY TO IMPROVE YOUR PERSONALITY

Can you imagine our life without discrimination, racism and fury? Unfortunately, no, but we try to change it. Nowadays, there are a lot of organizations which make our world better. In my opinion, youth are makers of the future and it is very important to bring kindness into them. There are a lot of chances for the youth, they can choose any university they want, but every coin has its two sides, from one side, they can study abroad, choose any college or university, travel and develop where they want. But, from another side, student faces with rude, discrimination, racism and others. This paper is devoted to an essential problem of relationships in society between young people. One of the charity organizations is “youth without borders” trying to change the situation of discrimination in better way. “Youth Without Borders” focuses on empowering young people to work together and changing their communities in positively. It is the youth run organization that believes in the power of diversity and the magic of project based on collaboration. “Youth without borders” provides support for young people and make their own ideas real. We believe that through the power of partnership, the needs of young people can be met.

In my opinion, young people have to believe in a world where everyone has access to the opportunities that enable them to realize their full potential. Such organization was developed for such goals.

In Ukraine, we have a lot of students from other countries and it is very important to develop “youth without borders “ for supporting them. Also, there is a great chance for Ukrainian students to study in other countries. It can help build an effective dialogue between the progressive youth of both countries planning joint projects and initiatives, studying new aspects of cultures, etc.

In every university there are some clubs, for example, in the National Aviation University it is “Nauhab”, where students can exchange their ideas, discuss some problems, create something new, develop their personal qualities. It will be great to create such organization like “youth without borders” in every university and college in Ukraine. In such way, students will get support from others and make new friends. These actions will not only help students from other countries but raise the economic of our country.

In conclusion, I would like to say, no matter from what country you are from, just be yourself and respect others.
