КОНТРОЛЬНІ ЗАВДАННЯ

CARD 1

1. The flight control systems (fly-by-wire, mechanical, hydromechanical).
2. What animals are most often transported by air?
3. What is your favourite type of plane? Why?
4. Do you know what these abbreviations ECAM, RMP, PFD, CVR stand for?
5. Give the definitions to the following words: bird scarer, CCTV cameras, heads-down time, fixed-wing.

CARD 2

1. In fifty years` time, how do you think flight control systems will be different?
2. Do you know of any incidents or accidents related to hydraulic failure?
3. Prepare a short talk on “Minimizing stress” for people just starting their career.
4. Do you know what these abbreviations TCAS, EFB, FDR, EICAS stand for?
5. Give the definitions to the following words: ultimate control, hang-glider, CPR, EpiPen.

CARD 3

1. What do you think is the most common cause of fires on board planes?
2. What is a microburst?
3. What places for an emergency landings do you know?
4. Describe the most amazing aerobatic manoeuvres: half roll, full roll, inside loop, outside loop.
5. Give the definitions to the following words: airways, anaphylactic shock, black ice, bumpy.

CARD 4

1. Do you have an aerial firefighting service in your country or abroad?
2. What incidents caused by fire have you heard about?
3. The flight control systems (fly-by-wire, mechanical, hydromechanical).
4. Give the definitions to the following words: ignite, short circuit, defibrillator, first-aid kit.
5. Describe the most amazing aerobatic manoeuvres: hammerhead, tail slide, Cuban eight, barrel roll.

CARD 5

1. Tell about some words and phrases for describing fires (to start, to continue, to stop).
2. In your opinion, is fly-by-wire safer than a conventional mechanical control system?
3. Have you ever heard of an incident where a plane has almost run out of fuel during flight?
4. Give the definitions to the following words: glider, tow truck, override, built-in limits.
5. Prepare a short talk on “Minimizing stress” for people just starting their career.

CARD 6

1. What kinds of symptoms and actions do you know for each of the medical problems (heart attack, hypoglycaemic episode, fractured arm).
2. Tell about the parts of an aircraft that can be affected by hydraulic failure?
3. In your opinion, is fly-by-wire safer than a conventional mechanical control system?
4. Give the definitions to the following words: spread, set off, fuel shortage, fuel starvation.
5. What do you think is the most common cause of fires on board planes? What incidents caused by fire have you heard about?

CARD 7

1. In your opinion, what plane has revolutionized air travel? How is/was it different from other planes?
2. What is your favourite airport? Why?
3. What can we do to reduce air pollution from aviation?
4. Give the definitions to the following words: fuel capacity, fuel flow, fuel gauge, slippery, slush.
5. Tell about the parts of an aircraft that can be affected by hydraulic failure?
